

## Iowa Legislature

We're right in between two funnel deadlines, which means there's been a lot of floor activity this week. A few bills that we have been watching and/or lobbied on have passed and are on their way to the Governor:

- [SF 538](#) - would prohibit gender affirming care to minors (enrolled\*) - IPHA opposed
- [SF 514](#) - government reorganization (awaiting enrollment)
- [SF 262](#) - consumer data protection (awaiting enrollment)

\*Once a bill passes both chambers it needs to be enrolled (final preparation of the bill) before going to the Governor for signature or veto. A list of all enrolled bills can be found [here](#).

There are several more bills that we are watching that we expect to move in the next two weeks before the second funnel deadline (3/31), including legislation that would remove the requirement to teach students about HPV and the vaccine to prevent it, and HIV. Today's paper edition of the [Des Moines Register](#) led with reporting this issue. I and several [Iowa Immunizes](#) members were quoted in the article.
